

May You Have Good Fur-Fellows

Many of the home and pet owners that we speak with have had experiences using a kennel or cattery to care for their pet while they've been away. And that's why they're now engaging house and pet sitters through our website for the care of their pets.

Not only does [engaging a house and pet sitter](#) save them money, but the overall wellbeing of their pets in their absence, is significantly improved.

In this edition of Mindahome's e-newsletter, we've share the story of Veronica, a Mindahome house and pet sitter who sketches the pets she cares for as thank you gifts for the pet-parents. She, like many of our house and pet sitters, becomes a 'fill in pet-parent' and gives the pets she cares for personalised attention.

If you're planning to travel and need to [find your ideal house and pet sitter](#), go online and browse thousands of amazing house and pet sitter profiles, or [list your position for free](#) and have the sitters apply directly to you.

Treat your pet to personalised care with a house and pet sitter nest time you have to travel!

Fur-Ever Friends Forever

Veronica spends hours sketching the pets she cares for on her house and pet sits. And then she leaves the pet-parents the original sketch as a thank you gift. You can't get any better personalised care and attention than this! [More...](#)

5 Cool Ways to Spoil your Fur-Friend

The human and animal bond is so special - let's celebrate it! Whether it's your fur-friend's birthday or adoption day, or just because, try these cool ideas to spoil your fur-friend! [More...](#)

Pet Health: Autumn Pet Considerations

It's the time of year when we're all feeling a little lack-lustre, a little tired and, well, just unmotivated. Our pets are at risk of feeling the same way, so here are some things to consider as the cool weather gets even cooler, to ensure the health and well being of our pet-pals.

Monitor Food and Exercise

As it gets cooler, our pets need more energy to stay warm. So especially for those pets who love the outdoors and running around, you may be tempted to feed them a little extra to keep their energy levels high. Just be aware of the amount of food your pet is consuming in relation to the amount of exercise that they're doing. You don't want your pet to reach the end of winter with excess weight which could cause other health concerns.

Watch Out for Ticks

The fallen Autumn leaves are just calling out to our fur-friends to have a roll around in and it may look like fun. Although not that common in the cooler months, it's always a good idea to still be mindful of the possibility of ticks lurking, so be sure to keep your pet's tick prevention up to date.

Watch Out For Fungi

If you tend to enjoy your daily walk, or live, in damp wet areas, scan the places where your pet goes to for fungi. Mushrooms can pop up in damp areas and could catch the eye of your unsuspecting fur-kid. But some fungi can be harmful to our pets, so be sure to seek advice from your vet if your pet starts showing unusual symptoms or behaviours.
